LECTURER'S NAME: DR. HASWADI BIN HASAN

NO.	NAME	MATRIC NUMBER
1	NURUL AIN BINTI MOHD SANI	A24CS0172

The Industry Visit 1 to UTM Digital was a valuable experience that gave us a closer look at how digital services operate within a university setting. The visit started with a speech from UTM Digital members, where they explained their job scopes and the various services they provide. This session helped us understand the important role they play in managing and maintaining the university's digital infrastructure.

After the briefing, we had the opportunity to visit their working site in person. Seeing how they work firsthand was insightful, as it gave us a better understanding of the technologies they use. We also had the chance to interview some of the workers, which provided us with deeper insights into their daily tasks, challenges, and experiences in the field.

One of the key learning points from this visit was about videography. Since we had to create a video as part of our assignment, we learned how to properly capture footage and document our experience effectively. Additionally, we practiced taking notes in person, which helped us organize the information we gathered throughout the visit.

Overall, this industry visit was a great learning experience. It gave us practical knowledge about digital services, hands-on exposure to real-world technology, and skills in videography and note-taking. The visit not only deepened our understanding of UTM Digital's work but also provided us with useful skills that can be applied in future projects.
