NO.	NAME	MATRIC NUMBER
1	NURUL AIN BINTI MOHD SANI	A24CS0172

Industry Talk 3 highlighted the key skills needed for success in both university and the workplace. I learned that adaptability and analytical thinking are crucial in the tech industry. To improve these skills, I plan to focus on problem-solving through group projects and internships, which will help me gain practical experience.

The speakers also emphasized the importance of soft skills in the professional world. I realized that technical knowledge alone isn't enough. I need to develop my communication and leadership skills, so I'll start participating in activities that challenge me to improve in these areas and build my character.

Mr. Mohd Hakimi Iqmall, our first speaker talked about the importance of technical skills, such as programming languages, debugging, and understanding databases. He also highlighted the need for management skills, including problem-solving, communication, and teamwork. Mr. Nik Mohd Habibullah, our second speaker encouraged us to improve our communication skills and get involved in activities early on. These insights have motivated me to take action and start building the skills I need to succeed in the industry.
